Examiner's Statement of Reasons for Allowance

U.S. Patent and Trademark Office PTOL-37 (Rev. 1-04)

of Biological Material

Paper No./Mail Date 10

4. Examiner's Comment Regarding Requirement for Deposit

Application/Control Number: 10/806,538

Art Unit: 2883

Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-42, drawn to a system for assessing the transmission of light between two optical fibers, classified in class 385, subclass 55.

II. Claims 43-44, drawn to a method of assessing the attenuation of light transmitted between two optical fibers, classified in class 385, subclass 50.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case Invention Group I can be practiced for assessing modulation of light or intensity profile of the light transmitted between two optical fibers than that of assessing the attenuation of light as claimed in invention II.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: A) claims 8 and 1-7 directed to including a detector cover, at least a portion of which is movable in a plane parallel to said detector base, said movable portion having an open position and a closed position, the open position

Page 3

permitting insertion of said second fiber into said detector; B) claims 9-24 and 1-7 directed to including said fiber entering said injector in an entry direction and emerging from said injector in an exit direction, said entry and exit directions being substantially parallel, and said fiber traversing a path through said injector in a plane which is substantially parallel to said injector base; C) claims 25-39 and 1-7 directed to including a light responsive element positioned proximate said exit face of said detector window. whereby light emerging from said fiber at said entry face passes through said detector window and thereafter into said light responsive element; and said fiber entering said detector in an entry direction and emerging from said detector in an exit direction, said entry and exit directions being substantially parallel, and said fiber traversing a path through said detector in a plane which is substantially parallel to said detector base. D) claims 40 and 1-7 directed to including injector base attachable to substrate and a light source positioned proximate said entry face of said injector window, whereby light emanating from said source passes through said injector window into said fiber at said exit face; E) claims 41-42 directed to a light responsive element positioned proximate said exit face of said detector window, whereby light emerging from said fiber at said the arcuate entry face passes through said detector window and thereafter into said light responsive element.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Buff on 9/12/05 a provisional election was made with traverse to prosecute the invention of Group A, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-44 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 2883

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Ernest Buff on 9/15/05, in order to facilitate allowing the case by canceling the non-elected claims 9-44.

Please cancel claims 9-44.

Reason for Allowance

Claims 1-8 are allowed for the following reasons:

The instant application is deemed to be directed to a nonobvious improvement over the invention patented in Pat. No. Lukas et al. (Us 4735481).

Claims 1 and 8 are allowed because the prior art of record, taken alone or in

Application/Control Number: 10/806,538

Art Unit: 2883

combination, fails to disclose or render obvious an injector window having an entry face

Page 6

and a concave, arcuate exit face; an injector mandrel having a shape complementary to

that of said exit face of said injector window, and being biased to clasp a portion of said

first optical fiber in intimate contact between said injector mandrel and said exit face of

said injector window, said injector mandrel being reversibly retractable from said exit

face in response to motion of said injector cover from the closed position to the open

position thereof in combination with the rest of the limitations of the base claim. Claims

2-7 depend on claim 1 and therefore they are also allowed.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany

the issue fee. Such submissions should be clearly labeled "Comments on Statement of

Reasons for Allowance."

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to K. Cyrus Kianni whose telephone number is (571) 272-2417.

The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 6:00 p.m. If

attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Frank Font, can be reached at (571) 272-2415.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9306 (for formal communications intended for entry)

Art Unit: 2883

or:

Hand delivered responses should be brought to Crystal Plaza 4, 2021 South Clark Place, Arlington, VA., Fourth Floor (Receptionist).

PRIMARY EXAMINER

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (703) 308-0956.
